

PSEG Energy Insights

May 2019

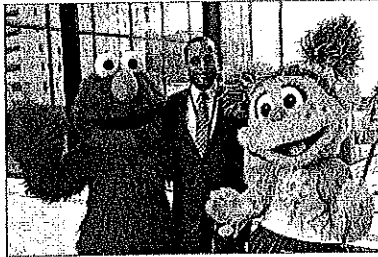

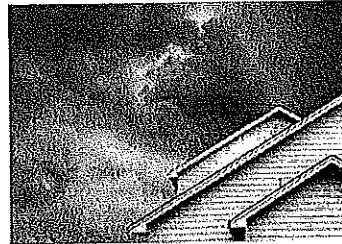

Safety is always PSE&G's top priority and we encourage people to enjoy all of the comforts and convenience of electricity while paying attention to and avoiding potential hazards. This is the perfect time of year to perform routine checks in homes and businesses to prevent electrical shocks, injuries and fires. Also, taking the time to brush-up on emergency safety tips can save lives.

Frank Lucchesi - Sr. Regional Public Affairs Manager

Hurricane Season Preparedness

The 2019 Atlantic hurricane season officially begins on June 1, 2019. Please click [here](#) for information on actions to take before, during and after a storm. Other topics include: Preparing an Emergency Toolkit, Gas Generator Safety and Flood Safety. NOTE: If downed wires are blocking a road, and especially if the wires are entangled in a fallen tree, it is important to advise the PSE&G operator of the road closure so the location is assigned the proper priority status.

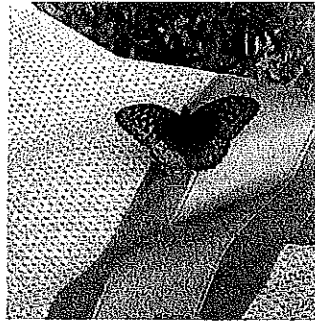

Sesame Street & PSEG Partner for New Jersey's Families

Sesame Workshop Family Guides, "Brave, Strong, Resilient" are available to municipalities, schools and recreation programs. To place an order, please email Contributions&Events@pseg.com and provide a contact name, number and email. For more information, please click [here](#).

Butterflies, Blooms and Beauty in PSE&G Right-of-Ways

Public Service Electric & Gas maintains over 1,200 miles of electric transmission right-of-ways in New Jersey. Federal and state regulations require utilities to manage trees and other woody vegetation under electric transmission lines to prevent power outages. This maintenance program creates an excellent opportunity to enhance pollinator habitats, helping to meet electric reliability and environmental goals. See how PSE&G is creating important habitat that supports biodiversity by clicking [here](#).

PSE&G Honored With Innovation Award for Energy Efficiency Work at New Jersey Hospitals

Smart Energy Decisions recently honored PSE&G with an Innovation Award for work done through PSE&G's Hospital Efficiency Program to make 36 New Jersey hospitals more energy efficient. PSE&G recently filed a Clean Energy Future proposal with the New Jersey Board of Public Utilities to make critical investments in clean energy and advanced technology that would position New Jersey as a national leader in energy efficiency and jump-start other clean energy priorities. Please click [here](#) for more information.

Mylar Balloons Can Pose Safety Hazards - PSE&G Warns

Balloons are common at outdoor family events and graduation ceremonies and they should be secured for environmental reasons and to help ensure electric safety and reliability – especially Mylar balloons which cause power outages when they contact power lines. PSE&G offers safety tips for handling Mylar balloons and other toys that should be kept away from power lines. For more information, please click [here](#).
